

BCubed® for BIGGBY® COFFEE

BTECHNICAL BULLETIN

How to Mount Items to Building Exterior

Exterior finish options for the BCubed® for Biggby® Coffee units include the Wormtrail Dryvit or Brick Veneer. Both are concrete based products.

For both finishes choose exterior screws that are sized large enough to hold the object getting mounted and long enough to penetrate the exterior wall of the building. Use caution to avoid drilling or screwing into piping, wires, or interior wall finish. When mounting to the exterior of your building pre-drill all holes. Finish with silicone to create a weather tight seal.

EnduraWal™ from Fullerton Finish Systems is a reinforced cement board product, distinctive acrylic stucco finish coat. EnduraWal™ is designed with a base coat, fiberglass mesh and strong polymer finish, ensuring you a great look that won't break, shift, or crack. **EnduraWal panels are ½" thick.**

CastWal™ is a beautiful and durable molded product of polymer modified cement. It is available in a split-face block pattern. Tough, impact-resistant, and totally water-resistant, CastWal™ requires no costly resealing or moisture-proofing. **CastWal panels are 1" – 1 ½" thick throughout the panel.**
